

COMPANY PROFILE 2026

DEJA ENGINEERING

Packaging machines, production lines, tanks & automation —
designed and manufactured in Egypt since 2010.

Plot 232, Industrial Zone, 6th of October, Giza · www.dejaengineering.com

Deja Engineering is an Egyptian engineering company specialised in designing and manufacturing packaging machines and complete production lines. With more than 15 years of field experience, we turn our clients' products into efficient, reliable and hygienic manufacturing operations — from a single filling machine to a full turnkey factory line.

We work across food, pharmaceuticals, cosmetics, chemicals and detergents, supporting every project from the first consultation through engineering, manufacturing, installation, training and lifelong after-sales service.

Our mission

To deliver world-class engineering solutions at local speed and cost — machines that run reliably, are easy to maintain and are backed by a team that stays with you.

Filling & packaging machines

Cup fillers, VFFS, auger and piston fillers for powders, granules and liquids.

Sachet & stick-pack machines

Multi-lane sachet machines for food, pharma and cosmetics.

Tanks & mixing systems

Stainless jacketed tanks, mixers, homogenisers and CIP systems.

Complete production lines

Turnkey lines for chocolate, confectionery and food products.

Food processing lines

Washing, sorting and processing lines for fruit and vegetables.

Automation & control

PLC, HMI and electrical panels, upgrades and line integration.

01 V-type powder blender

02 Blister packaging machine

03 Vacuum mixing & homogenising reactor

04 Powder mixing & auger filling line

05 Triple-head auger filling machine

06 Piston liquid filling machine

Our 9-step process

1

Consultation

We listen to your product, goals and constraints.

2

Site & product study

Analysing product behaviour, space and utilities.

3

Concept design

Defining the right machines and layout.

4

Detailed engineering

3D design, electrical and control drawings.

5

Quotation & approval

Transparent offer with timeline and scope.

6

Manufacturing

Fabrication and assembly in our workshop.

7

Factory testing

Running your product before delivery.

8

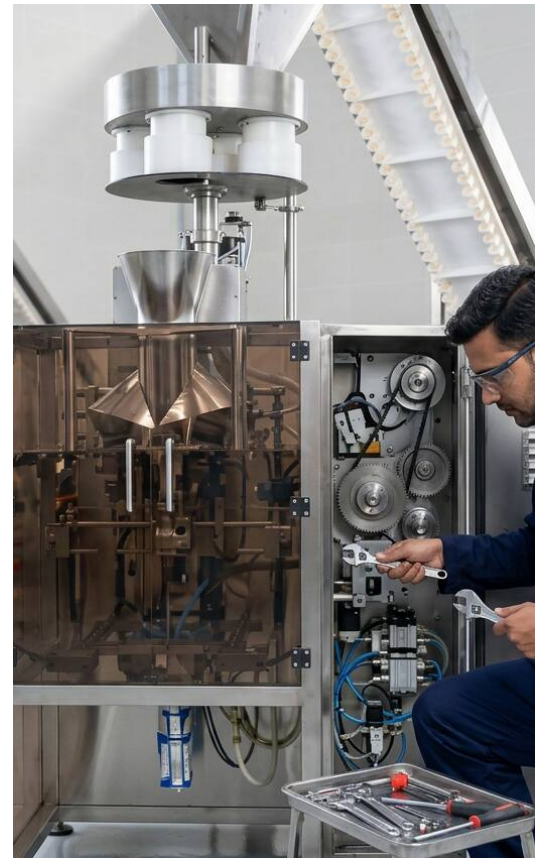

Installation & commissioning

On-site setup until target output.

9

Training & after-sales

Operator training, maintenance and spare parts.

Maintenance & spare parts

- Preventive maintenance programmes
- Fast emergency repairs
- Locally made original spare parts
- Operator training
- Performance audits
- Annual maintenance contracts

Industries we serve

Food & beverages

Pharmaceuticals

Cosmetics & personal care

Chemicals & detergents

Confectionery & chocolate

Agro & vegetable processing

Export & international projects

Egyptian engineering, delivered across the region — machines and lines installed and supported in:

Algeria

Yemen

Sudan

Saudi Arabia

Egypt
